

Child Care Services

Technical Diploma

The Child Care Services Technical Diploma prepares students for working in a child care setting as a lead teacher. Earning this technical diploma allows students to complete their education in as little as one year. Additionally, students enrolled in the Child Care Services Technical Diploma will complete the first year of the Associate of Applied Science in Early Childhood Education at Nicolet College, setting them up for future educational opportunities.

In the Child Care Services Technical Diploma, students will gain a deeper understanding of child development, curriculum planning, classroom management, and implementing a healthy and safe classroom environment. This diploma includes one field experience course, which gives students a hands-on opportunity for applying what is learned in the college classroom.

This 30-credit diploma is designed to acknowledge the educational requirements for a child care teacher. Completers of this diploma will meet the educational guidelines for teachers in child care centers and will be recognized as Wisconsin Registry Career Level 11. This diploma is a great choice for child care programs looking to support staff's professional development, as well as improve Youngstar ratings.

Program Outline

TERM 1		
Course #	Course Title	Credits
1030714800	ECE Foundations of Early Childhood Ed This 3-credit course introduces the early childhood profession through a historical overview of the field. The course will explore program trends, quality indicators, and developmentally appropriate practices for children birth to age 8.	3.00
