

# Professional Licensure by State

Many professions require a state license or certification for employment in the profession in the state. Educational requirements for the license or certification can vary from state to state. The applicability of the curriculum for the following Nicolet College professional programs for each individual state's licensure or certification is listed by state in the table below as "Meets," "Does Not Meet," or "Not Determined" where no determination has been made. In the cases where no determination has been made, please contact the Dean of the program for more detailed information and for references on how to determine licensure or certification requirements in that particular state.

## SARA Professional Licensure by State

Please note that licensure status could change at any time, This information is reviewed on an annual basis. Please contact the program dean for further information or questions.

Updated July 2021

ND = Not Determined
